

# STAINLESS STEEL POLISHING MACHINE

# P7

P7 Polishing Machine is entirely made of stainless steel. It is ideal for sharpening and maintenance of knives in sharpening businesses and workshops, as well as in the food industry sector.

P7 Machine has two workstations, in which diverse polishing and grinding wheels can be assembled.

P7 incorporates one abrasive flap wheel of 200 mm diameter and 50 mm width.

Both workstations/polishing wheels protections have suction hoods of 40 mm diameter.

The polishing wheels rotation speed is 2.900 R.P.M.

P7 incorporates a cotton polishing wheel of 200 mm diameter and 35 mm width.

Maximum polishing wheels width	50 mm
Polishing wheels diameter (standard)	200 mm
Polishing power	0.75 Kw - 1.0 Hp
Voltage	230 V Single-phase
Width x Depth x Height	510 x 265 x 320 mm
Packaging dimensions	550 x 300 x 400 mm
Approximate weight with packaging	35 Kg
